

1. COVER SLIDE

WEEK 4

DATA VISUALIZATION
& DASHBOARDING

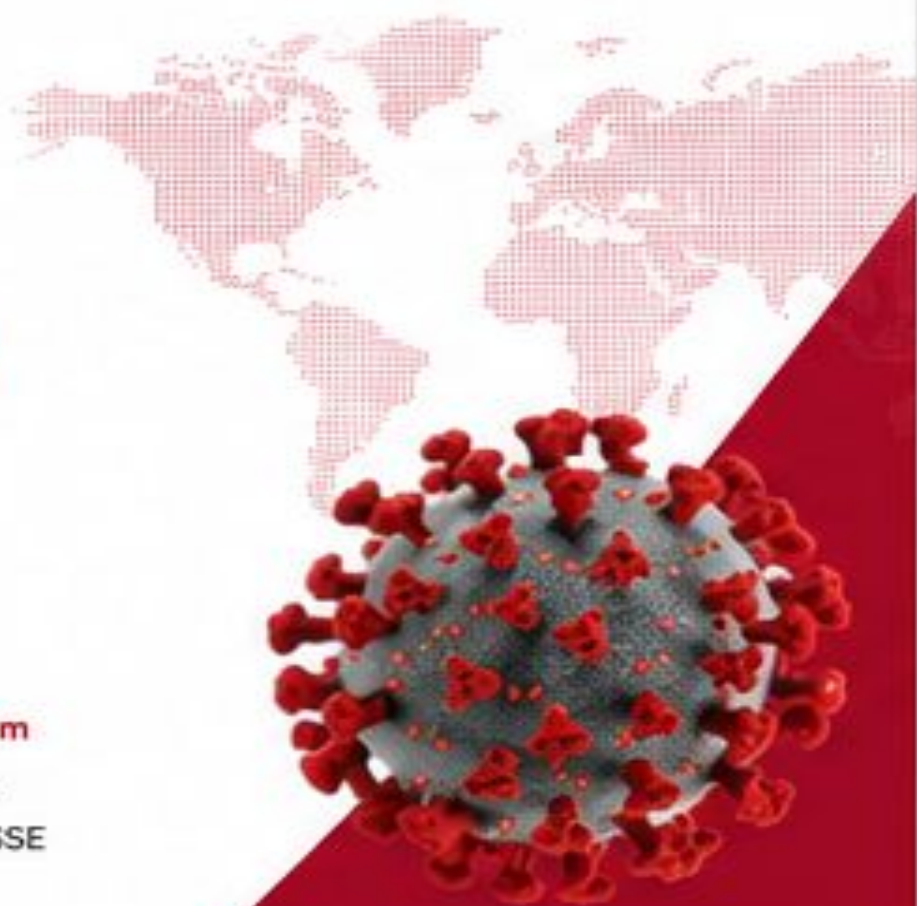

COVID-19

Global Impact Dashboard

AnalystLab Africa — Batch B Internship Program

June 2025 — Analyst: Adekoya Kikelomo Akorede

Tool: Tableau Public • Dataset: Johns Hopkins CSSE
COVID-19 Dataset (2020–2022)

2. DATASET OVERVIEW

DATASET OVERVIEW

3.6M+

Total Records
of COVID-19 data

226

Countries
covered

3

Years of data
2020 – 2022

11+

Key Metrics
Tracked

KEY COLUMNS IN DATASET

Date, Country/Region, Confirmed Cases, Deaths,
Recovered, Active Cases, Death Rate, Population,
New Cases, New Deaths, New Recovered, etc.

3. BUSINESS PROBLEM

WHAT THE BUSINESS NEEDS TO KNOW:

- Which countries are most affected?
- How are cases and deaths trending over time?
- What is the death rate across countries?
- Where are the highest risks and hotspots?
- How does the situation vary by region?

DASHBOARD GOAL

Provide an interactive view of global COVID-19 impact to help stakeholders monitor trends, identify high-risk countries, and support data-driven decisions.

4. KPIS DEFINED

Key Performance Indicators tracked in the dashboard

Total Cases

84.21M

Total confirmed cases globally

Total Deaths

1.03M

Total deaths recorded globally

Death Rate

1.22%

Global death rate (Deaths / Cases)

Countries Affected

226

Countries and territories affected

These KPIs provide a quick snapshot of the global impact of COVID-19.

5. INTERACTIVE DASHBOARD

Year of Data All

COVID-19 Global Impact Dashboard | 2020-2022 | Kikelomo Adekoya

Total Cases

84.21M

Total Deaths

1.03M

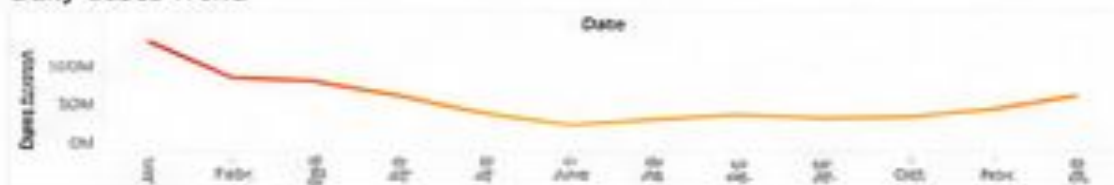

Death Rate

1.22%

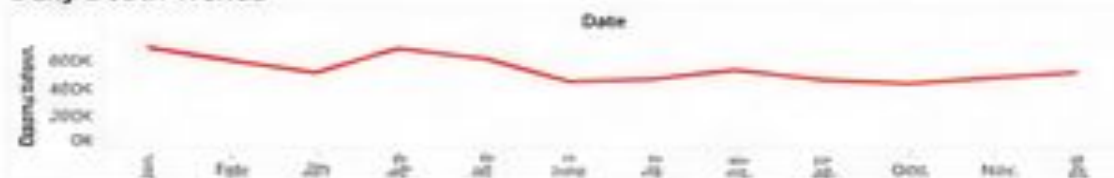

Countries Affected

226

Daily Cases Trend

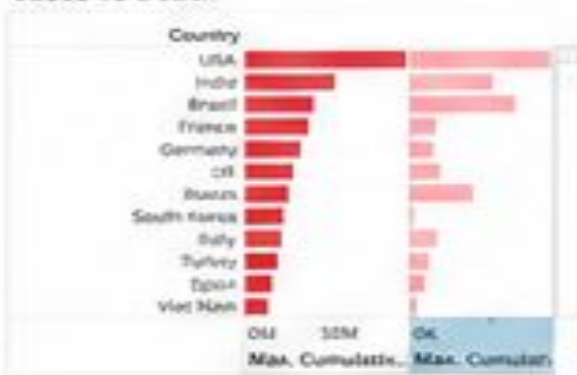

Daily Death Trends

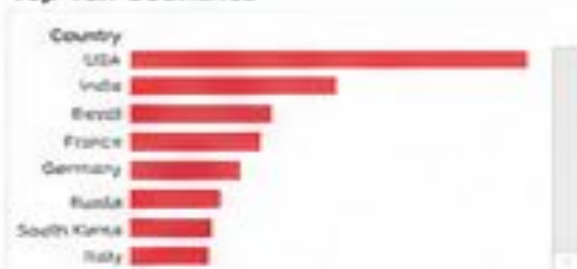

Global Map

Cases vs Death

Top Ten Countries

6. KEY INSIGHTS

The USA leads in total cases

The USA has the highest cumulative cases, followed by India and Brazil.

Cases declined mid-year, then rose again

Cases dropped from Jan to June 2020 but increased again towards year-end.

Death rate stands at 1.22%

This indicates the proportion of deaths among all confirmed cases globally.

Global spread is widespread

226 countries and territories have reported cases, showing the global impact.

7. RECOMMENDATIONS

01

Strengthen preventive measures

Promote vaccination, mask usage, and hygiene to reduce transmission.

02

Focus on high-risk countries

Allocate resources and support to countries with high cases and death rates.

03

Monitor trends continuously

Use real-time dashboards to track trends and respond quickly to surges.

04

Improve global collaboration

Share data, vaccines, and best practices across countries.

Kikelomo Adedoye

8. CHALLENGES & LEARNINGS

CHALLENGES FACED

- Handling missing and inconsistent data across countries
- Differing reporting standards and delays in data updates
- Choosing the right visualizations to tell clear stories
- Optimizing dashboard performance with large datasets
- Ensuring interactivity across multiple filters and visuals

WHAT I LEARNED

- Data quality is critical for meaningful analysis
- KPI selection drives impactful dashboards
- Simplicity and clarity improve understanding
- Consistent design enhances user experience
- Data storytelling turns numbers into actionable insights

9. PROJECT COMPLETE

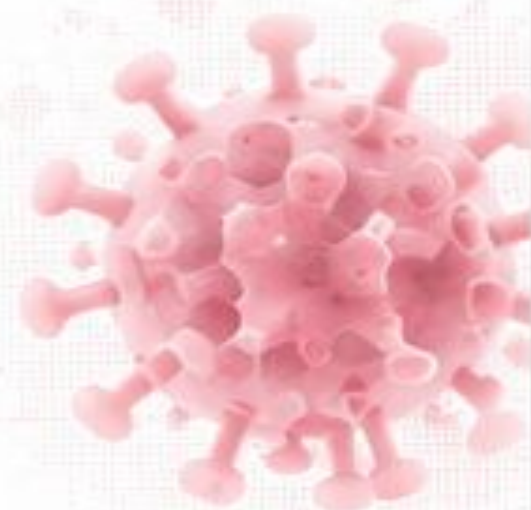

PROJECT COMPLETE

COVID-19 Global Impact Dashboard

Interactive dashboard built with Tableau Public
Dataset: Johns Hopkins CSSE COVID-19 Dataset
Period: 2020 – 2022 | Coverage: 226 Countries

Data for a healthier world.

Thank you!
